The Frackers are Coming!

September 21, 2011

RT

Riverkeeper Team

And, they are intent on drilling and leaving behind a trail of destruction. In every state where high-volume fracking has been allowed, the result has been polluted water, dirty air and an industrialized, blighted landscape.

The fracking threat is real and imminent. **Albany is gearing up to start permitting as early as April of next year** despite the fact that the State admits it's too short-staffed to handle fracking and that current, 40-year-old regulations must be substantially overhauled. If drilling is allowed to go forward under these conditions, we can kiss our world-class water supply goodbye and it will have grave repercussions for generations to come.

Riverkeeper is determined to stop this and will sue if state officials follow through with their plan to allow fracking before the necessary and proper safeguards are in place.

This is where we need you. With your financial support, Riverkeeper can take the steps to get Governor Cuomo's attention and make sure he gets this critical issue right. Become a Riverkeeper member with a gift of \$40 or more and you'll make a direct and positive impact on your environment, the health of your drinking water, and the fight against fracking.

Thank you for supporting Riverkeeper's efforts to protect our precious drinking water resources. With your help, we'll make sure that nobody fracks with New York's water!

Sincerely,

Paul Gallay

President and Hudson Riverkeeper

Take Action: **Tell Governor Cuomo & DEC Commissioner Martens to Stop the rush to fracking!**
